Phase 2 Factor 4: Exhibit F – Leverage

Commitments from state and local government, as well as from a charitable organization, broaden the reach of our resiliency objectives. This is evident through the direct and indirect leverage that we are firmly committing as a part of this application. See Attachment B for documentation of this leverage.

Direct Financial Commitments / Leverage

EEA commits \$66,165,985, MassDOT commits \$12,222,318, the Town of Greenfield commits \$451,000, and the U.S. Endowment for Forestry and Communities commits \$1,000,000 for a total of \$79,839,303 as direct leverage on this application.

Of particular note is that Commonwealth's direct financial commitment includes \$1,400,000 to the City of Springfield, reflecting the State's efforts to ensure climate resiliency in a Gateway City and to uplift its people who have been devastated by recent disasters.

Supporting Commitments / Indirect Leverage

EEA commits \$ 66,092,795, and MassDOT commits \$3,270,502.54 for a total of \$69,363,297.54 as indirect leverage on this proposal.

Total leverage of \$149,202,600.54 provided by the Commonwealth exceeds its request of \$87,519,854.
